Several years ago we began collecting grades and standardized test scores for students in 9th – 12th grade. If you have a high school student, you must provide us with a record of their classes, grades and high school credits earned (even in 7th and 8th grade). We need an ongoing record of their grades and credits to build their transcripts to be able to do a class ranking at the end of each school year. Please remember to send **documentation of honors** and transcripts from the colleges where dual credit classes were taken. Even if your student does not plan to attend college **he/she MUST be included in the class ranking**. If we do not rank in all the high school years, the Commission on Higher Education will not accept our scholarship applications.

In an effort to get the transcripts done by the time students need them, we have set a new deadline. If you have a student who has completed their *junior year* and is moving into the senior year we need the Class Ranking Form by **June 15th**. If this is not possible, please contact us. About a third of the class applies to colleges during the early admission period and must have a complete transcript with a CURRENT class ranking on it. We must have the all forms on time to calculate the GPAs for all the students in the class to complete the ranking.

Even if you are **not renewing** with us for the coming year, we still need the grades from the past year (when you were registered with us) to complete the class ranking.

Most of the information on the class ranking form is fairly obvious, but here are a few things that might need clarification.

- **School Name:** The school name is what you call your home school. It is not a co-op or private school that the student may have attended. If you do not have a specific name for your school, we use the default of your last name and add home school to it (e.g.: Freitag Home School).
- **Standardized testing:** Any standardized test (Iowa Basic Skills, Stanford, etc.) will meet PHEA's requirements. We only put the SAT or ACT scores on the transcript, therefore we only have spaces for those tests on the class ranking form. Please send us a copy of the standardized testing you did during the past year.
- **Secondary Schools Attended:** These are public or private high school or any college where the student has done dual enrollment courses. If your student has attended any of these types of schools, please make sure we have a copy of the transcript in our files. Whenever a new transcript is made, the information must be transferred from the previous school's transcript. The original transcript helps us to record the information accurately.
- **Class:** These are the names of the specific class that your student took each year. We need the specific name (World Geography) not the broad category (history). We may suggest combining certain classes or renaming a class to keep your student's transcript from raising red flags for admission counselors.
- **Taken At:** If your student did the class at a co-op or high school or college, please record that location (and make sure if it is a secondary school that you have filled in that box as well).
- **Level:** Classes may be College Preparatory (CP), Honors (H), AP or Dual Enrollment (DC). Most classes are college prep.
 - If you believe a class is an honors level, the **PARENT** must document how the class exceeds the college prep standards set by the state. The State Department of Education has issued a 50 page document explaining honors level documentation. This document

primarily pertains to public school students however you should use it as a guide to see what level of work and documentation is considered honors level. If your student chooses to enter public school, they will ask for this documentation. It is possible that colleges may also ask for it so it is important to be thorough. Our website has the state criteria for what is included in the college prep level as well as this document. You must document the text book (an honors class must have a differentiated text book) and how the class was more rigorous. You must also submit a **syllabus** (the table of contents is not the same thing as it does not show what material from the book was covered.)

- For a dual enrollment or AP class, we need the transcript with the final grade from the institution where the student took the class. Please note that colleges only send letter grades which we have to convert to a specific numerical grade based on the SC Uniform Grading Policy. The new Uniform Grading Policy states that we must use the numerical grade from the class. There are two ways to get this. One is to take a screenshot of the grade on their student account and email it to us. You need to do this immediately after the grades are posted as they are only available for about a week. Alternately, your student may email the professor to ask for the numerical grade to be emailed back. Some professors will do this, but some won't. Without that verification of the numerical grade, we will assign the letter conversion grade.
- **Credits:** Credits are based partly on the material covered and partly on the hours spent in class. If you are using a standard high school textbook and the student completes the entire book, your student earns one credit. However, a student usually earns only one credit of English per year even if they are using several books (e.g. BJU Press: literature, grammar/writing, spelling, vocabulary, etc.). If you are documenting something like PE or Home Economics, you should keep track of the hours. One credit is a minimum of 150 hours of class work. Half and quarter credits may be given.

Please include a list of the courses planned for the coming year. This does not lock you into the classes – if you decided to do something different, just drop us an email and let us know.

PLEASE keep a copy of your student's class ranking form and update the same form each year which will give us a complete list of classes (instead of a separate sheet for 9th, 10th, 11th and 12th grades). This prevents confusion on what classes have been sent in already.

Thank you for your help in providing the documentation. We will happily help you with any questions or concerns you have. Please email forms and/or questions to pheatranscripts@gmail.com.
